

MXD

How We Do It?

Mytrex's systematic approach to designing PERS is unique; Mytrex utilizes its vast experience and knowledge gleaned from designing not only PERS, but also the monitoring software and hardware that is used to monitor PERS. Furthermore, Mytrex's main business function is to design and manufacture PERS, and all resources are allocated to that end. As a result, those who purchase the MXD can rest assured that the product has been designed with their best interest in mind.

MXD

THE MXD: Your answer to telephone service compatibility

MXD

The MXD is the first traditional PERS on the market to be completely VoIP compatible. When a customer switches from POTS to VoIP, the MXD simply makes the call when needed. As more people get rid of their POTS lines and switch to the other mediums of communication, the MXD will continue to become more and more valuable to PERS dealers.

REPORTING FORMATS (partial list)

1. Contact ID
2. Account + Alarm + Checksum
3. Mytrex MXD Format
4. Voice Signaling
 - Account Code or Serial Number + Alarm Code

EASY-TO-USE PERS

The small footprint, voice prompts and messages, range test mode, reversed telephone connection reporting, and VoIP compatibility make the MXD the simplest PERS to install in the industry

The Mytrex Advantage

Please visit www.mytrexinc.com and watch the video at the bottom of the page. This video illustrates the benefits you will realize when you incorporate the MXD into your product line.

WHAT'S NEW

The MXD is designed to be more cost effective to own, monitor and service than any other unit in the industry. The MXD is compatible with POTS, Cable, VoIP, Cellular terminals such as Verizon Home Connect, and more.

- Designed to communicate in all formats, into any central station
- Compatible with VoIP- even Magic Jack!
- Compatible with cable telephone systems
- Compatible with GSM cell terminals
- Compatible with CDMA cell terminals (Verizon Home Connect)
- Typically 5-7 years before base unit battery replacement
- Typically 7-year panic button battery (Monitored Battery)
- Receive MXD's pre-programmed with receiver numbers, account ID, etc.
- Private labeling available
- The base unit back-up battery provides power for up to 80 hrs
- Monitored panic buttons
- High quality simplex and duplex modes
- Two-way speaker phone feature- programmable
- Dealer can program units locally and remotely
- Smallest waterproof panic button in the industry
- Panic button range of 600-1000 feet
- Panic button range test mode
- Monitor Mode (facilitates more efficient troubleshooting with customers)
- Voice messages and prompts
- Easy to repair if/when needed
- Priced competitively (\$98.00)
